

Client Name	Self
Work Type	Web app development

Scope of Project Requirements:

Req#	Requirement Details	Effort Required	Comments/Feedback
Phase 1 1.0.0	Enrich UI to upload a spreadsheet with event registration detail (event name, participant name, email id ,phone number)		
1.0.1	Design a scalable backend to save the spreadsheet values and provision to update in the future during the event		
1.0.2	While uploading or after uploading generate a custom email to the participants with a QR code		

	for the event		
Phase 2			
2.0.0	When the user scan their QR code on the event conference center, it needs to be updated in the backend with the status as “attended”		Date wise qr code works
2.0.1	Ability to pull the custom report: Ex <ol style="list-style-type: none"> 1. How many people attended a conference & session 2. How many or what sessions a specific user has attended
